- a. contacting a mammalian cell with the ligand, wherein the cell has a plurality of steroid receptor response elements in an array such that the response element can be directly detected when bound by fluorescently labeled steroid receptor; and
- b. directly detecting the location of fluorescence within the cell, a change in the relative fluorescence of the nucleus to the cytoplasm such as to increase the fluorescence of the nucleus indicating a ligand that activates the translocation of a steroid receptor to the nucleus in a mammalian cell.--

REMARKS

The subject application is a divisional of U.S. Serial No. 09/091,042, filed February 12, 1999. An Office Action dated June 6, 2001 was issued in connection with U.S. Serial No. 09/091,042 by the United States Patent and Trademark Office. Applicants are concurrently filing herewith a Petition for a Three Month Extension of Time in connection with U.S. Serial No. 09/091,042. The extension of time maintains the pendency of the subject application until December 6, 2001. Accordingly, the parent application is concurrently pending herewith.

Claims 1-15 and 19-58 have been canceled hereinabove. Claims 16-18 are pending. Claim 16 has been amended. Support for amended claim 16 may be found in originally filed claims 1, 5, and 16.

If a telephone interview would be of assistance in advancing prosecution of the subject application, applicants' undersigned attorney invites the Examiner to telephone her at the number provided.
